Subject: Standards for AVVPAT

Should California reject the proposed Diebold system? Vote=Yes

Dear Senators and Representatives,

I think Diebold must be not be a part of installing voting machines unless these requirements are met:
The AVVPAT shall be printed on single sheet non-thermal at least 16 pound paper, one record of vote per sheet.

Every recorded vote, no matter how recorded, shall have a AVVPAT copy.

The AVVPAT record of the vote shall be printed in a minimum of 12 point font.

The AVVPAT shall be printed and organized to be easily read by both the voter and election officials.

The AVVPAT during the 1% manual audit and any recount shall be physically verified and hand counted only.

The recorded vote choices on the AVVPAT shall not be audited or recounted by automatic or electronic methods.

There shall not be a method by which any particular voting record can be connected to any particular voter.

Any AVVPAT spoiled or rejected by a voter because of a voting system error shall not be counted as a spoiled ballot under the two spoiled ballots limit.

No remote access to voting machines by wireless or internet.

If Mr. Bush is always talking about Democracy, this is the way to do it...Free and Fair Elections.

Sincerely,
Joanne DiVito
North Hollywood, CA

Mr. Joanne DiVito
